

Junior Developer Job Description

FOR000235 v1.00

Job Title:	Junior Developer
Days and Hours of work:	Monday - Friday (full time 40 hours)
Location	Swanwick court/remote working
Responsible to:	Head of IT and Development

The Role

Citipost Mail is the UK's leading privately owned DSA provider, utilising expert knowledge and experience to provide cost savings for both UK and International Direct Mail campaigns.

We are ISO9001, ISO14001 and ISO27001 accredited. We recently became certified as a 'Great Place to Work' in April 2022 and we also hold the accreditation for Investors in People.

Such benefits we have to offer our employees include a Life Assurance policy, birthday day off, length of service awards and much more so if the below job description matches your skill set, get in touch today.

Working as a Junior Developer, you will be part of the IT team developing moderate to complex information systems, designing, building, and installing software solutions. Our systems are designed for the web, desktop, and mobile environments linking with on-premise centralised databases that uses various types of protocols for secure data exchange.

The candidate will be required to work for the wider Citipost group of companies on development projects as and when required.

Typical duties will include

- researching, designing, and creating and maintaining new and existing software programs.
- testing new programs and fault finding.
- Creating and updating documentation
- working closely with IT staff members and other departments as required
- Reporting and business analytics

Desired qualities, skills, knowledge

- Previous experience of: MVC, .NET, C#, JavaScript, SQL
- Unit testing
- Azure Devops
- Excellent communication skills
- Commitment to completing tasks to a high standard
- Ability to inspire a positive work ethic in those around you
- Approachable internally by others
